Cordoba Provincial Council

Administration of Local Councils

01 Cooperation and assistance

The Cordoba Provincial Council cooperates with municipalities by providing financial aid as well as technical, economic, technological and legal assistance and consultancy to the local councils of the province.

02 Services for 77 municipalities

The Cordoba Provincial Council aids the 77 municipalities of the province by providing local councils services they would be unable to afford on their own.

03 Balance and wellbeing

The Cordoba Provincial Council is also committed to achieving territorial balance, anchoring the population to the territory and ensuring the welfare of almost 800,000 citizens through access to quality services and infrastructures, regardless of where they live.

Spheres of Action

- Plan for the Digital and Sustainable Development of Cordoba province
- Working together for Cordoba

With an 1.800+ member staff, the Provincial Council is organised around 4 broad areas that provide services through its various departments and 11 **autonomous agencies**:

Finance, Internal Governance and Human Resources

- Finance and taxation
- Human resources
- Social cohesion
- Consumer information
- Citizen participation
- Youth
- Sport
- ICHL institute for financial cooperation
- Iprodeco provincial institute for economic development

“ Europe at the Provincial Council

The Provincial Council first created the Technical Secretariat of European Funds and later the Department of European Programmes, which is responsible for the selection, coordination, development, implementation and evaluation of EU financing measures. The institution has also been a member of the EuroDesk Network since 2009 and is the headquarters of the Europe Direct Cordoba Office, which has been operating since 2013.

The platform www.cordobanextgeneration.es currently provides information on Cohesion Policy financial tools as well as advice so that local councils, companies and citizens can benefit from the opportunities offered by the European Union.

- Subbética IAP
- North Zone IAP
- Guadalquivir Valley IAP
- Campiña IAP

Culture, Cités UNESCO Laboratoires de Territoires Urbains

Exchange practices of transnational governance for the management of historic city centres and the valorisation of cultural heritage through innovative cultural activities.

- Total budget: 2,012,000 euros
- Provincial Council budget: 193,180 euros

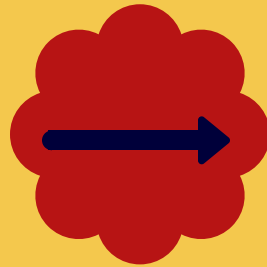

MED Programme 2007-13

Multiannual Framework Projects 2014-2020

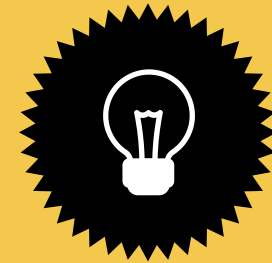

1. Espoban

2. Jacobean Routes

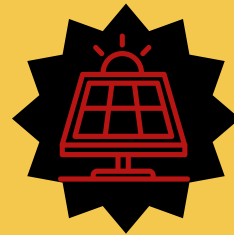

3. Enlaza

4. Smart District

5. Productive Spaces

6. Low-Carbon Economy

7. Other Projects

ESPOBAN

Spain-Portugal Business Angels Network

The Espoban project (Spain-Portugal Business Angels Network) aimed to facilitate access to private investment for Spanish and Portuguese business projects.

The project pursued two objectives: to attract business initiatives in the development phase that required financing or smart capital and to create a pool of private investors that could participate in both Spanish and Portuguese projects.

- 62 business initiatives
- 37 investors
- 3 investment forums

- Total budget 2,237,117 euros
- Cordoba Provincial Council budget: 449,323.69 euros

Interreg
España - Portugal

Fondo Europeo de Desarrollo Regional

Jacobean Routes in the Western Iberian Peninsula

This project aimed to revitalise the Mozarabic Way to Santiago on its almost 300-kilometre route through the province of Cordoba. Among other initiatives, the project involved:

- repairing damaged or deteriorated signs
- reconstructing river crossings and building rest areas
- furnishing pilgrim hostels
- promotional activities to engage local communities and businesses
- the creation of a cross-border network to invite local entities to join the network and offer their services
- actions to publicise the 14 stages and the other Jacobean routes of the Silver Way (Vía de Plata).

- Total budget: 2,237,117.88 euros
- Provincial Council Budget: 197,754.46 euros

Interreg
España - Portugal

Fondo Europeo de Desarrollo Regional

Enlaza: Córdoba, Municipios Inteligentes

 Enlaza takes advantage of local councils' existing infrastructures to incorporate a smart open data and open government platform, bringing the administration closer to citizens and enabling real control over infrastructures.

01 Smart services platform

02 Smart energy, waste and water management systems

03 Service analytics and optimisation systems; incident and asset management systems

04 Open data platform and citizen participation platform

Cordoba North and South Smart District (CITI)

The project aims to promote and broaden the smart city concept already being developed by the Cordoba Provincial Council through the **Enlaza, Cordoba Smart Municipalities project**, which has a single smart management platform that will also support this project.

More than 300,000 inhabitants of the province of Cordoba will benefit from the projects.

The Cordoba Smart District will include:

1. IoT sensorisation network
2. Smart Health
3. Smart Irrigation System
4. Environmental Monitoring Station (air quality, noise pollution, etc.)
5. Proximity System
6. Energy Management: Building Sensorisation
7. Video Analytics: Mobility, Security and Tourism

1,489,752 euros

European Social Fund

Espacios productivos

‘LOCALIZAIN+, Cualificación de espacios’ is a programme under which the Cordoba Provincial Council, through its provincial company CINCO, plans to enhance the industrial estates and technology parks of 14 municipalities in the province.

1

Revitalisation of green spaces

2

Installation of video surveillance systems

3

Installation of signage

4

Installation of advertising displays and information panels

5

Installation of EV charging points

6

Upgrading of public street lighting systems

7

Installation of remote management systems for the lighting systems

Singular Low-Carbon Economy Projects

The Cordoba Provincial Council, through its Delegation for Economic Assistance to Municipalities, has requested, secured and co-financed 134 projects for local entities in the province that seek to reduce carbon emissions and are committed to a green energy transition.

Specifically, the **152 public works** involve:

- Upgrading public street lighting with LED technology
- Rehabilitating the thermal envelope of municipal buildings
- Installing biomass heating systems and photovoltaic solar panels
- Plans for the implementation of sustainable urban mobility

41,032,371 euros
